The mission of **Snow College Resident Life** is to provide a clean, safe and secure living environment which promotes maturity, supports academic success and enhances personal growth through lasting life lessons in, and out, of the classroom.

Residential Life provides opportunities for residents to live in a safe and secure environment close to their classrooms. We understand that students have different needs, likes (or dislikes), and desires. While we cannot meet the wishes of each and every student, we do try to meet and enhance the basic needs of each student resident. Central to our mission, we focus on providing safe and secure buildings for our residents. We also know that happy, healthy and rested residents will do better academically and set standards to aid in building such an environment.

For most students, going to college is the first opportunity to live away from home. This is a time to grow personally and gain a better understanding of societal living. Residential life provides a sense of community, opportunities for input within the community and consequences for not meeting our society's [standards and policies](#). We understand that in this time of growth that our residents may have an infraction here or there. Our goal is to assist residents in learning from their miscues and become better citizens in the Resident Life community.

Our staff is committed to promoting an environment where students are more closely connected with the campus and geared toward academic success We understand that success begins with the individual. We are not in a position to make students eat all their broccoli, nor are we

responsible for their success. However, we can provide an environment conducive to success. As such, we do all we can to provide a safe environment where every resident's academic success is the focal point.
